ECO-MEET

You know what? A typical five-day conference for 2,500 attendees uses 62,500 plates, 87,500 napkins, 75,000 cups or glasses and 90,000 cans and bottles. Most business meetings may have a far smaller impact than that, but all of that waste still adds up fast. Whether planning a large annual conference or simply a weekly assembly of staff...

W Koh Samui presents the way of doing business with respect to the environment.

How?

Cutting back on waste by using eco-friendly meeting products like recycled paper, go paper-free with digital notifications, natural daylight, non linen meeting set up, water in jugs, online registration and slideshow presentations rather than handouts.

Anything else? We can do....
